Collaborative online spaces for *making, learning, exploring, and sharing.*

Create customizable engagement spaces that address the specific needs of your program.

Here are some of the spaces that have been created at other institutions:

For Students

These spaces develop growth mindsets, resilience, self-awareness, belonging, social emotional learning and more. Students can be creators or consumers or both.

Academic Research & Posters Sessions
The easiest way to showcase student work. Take poster sessions and research showcasing to the next level with live video conferencing, chat, or comments.

Club Hubs
A space where your students can explore, discover, and engage with relevant clubs on campus.

Career Fairs
Give students the ability to discover, connect, and engage with prospective employers.

Further Education Fairs
Give students a way to easily explore their potential educational paths.

Innovation Zones
Showcase student innovation with innovative ideas on campus. The easy way for students to share their vision, products, and services with an innovation zone.

Mentorship
Take a more direct approach to mentorship. Allow students to explore and communicate with mentors in new and current ways.

Mock Job Application
Have students apply to a fictitious job and receive feedback on their application.

Student Orientation
The fastest way for new students to learn the ins and outs of what it means to be a student in your program. Use it as an on-demand resource, a live event, or a combination of both!

Case Competitions
Create a stunning environment where students can share their best ideas and solutions - on a level playing field that looks professional and is easy to use.

Wellness Experiences
School and life are becoming increasingly stressful; create incredible and innovative online experiences to help students destress! Exam de-stressors and mental health events are great ways to support the wellness of your students.

Show & Tell
Allow your students to showcase their work with their peers in a trusted and private environment where they can get constructive feedback and build confidence.

Networking and Directory
Help prepare students to network more effectively by having them network within their program and with peers

Faculty Showcase & Office Hours
Give students a space to learn about and connect with faculty—a great way to dynamically host online office hours and elevate faculty status with students.

Bulletin Board
Increase the accessibility and value of your bulletin boards by taking them online! Great for students to share items for sale, rent, tutoring opportunities, job opportunities, and more!

Belonging - Diversity, Equity, and Inclusion Spaces
Build unique and tailored experiences for any demographic at your institution. Create an event celebrating indigenous heritage, a career fair for women in tech, etc.

Capstone Project Management, Review, & Showcasing
Make it easy to keep the capstone projects of your students organized, updated, and easily reviewable.

For Faculty

Spaces for faculty to engage in Professional Development, Career Advancement, Creativity, Orientation, Team Player, and Culture.

Development Workshops, Orientations, and Seminars
Give faculty a great place to learn more about the latest and greatest in teaching and learning.

Faculty Research Showcasing
Give faculty a private and secure place to share their work and research with peers. Foster increased collaboration and support within your program.

Mentorship
Empower faculty to connect for mentorship more easily.

Grant Applications & Reviews
Help streamline and improve faculty grant applications and incorporate more effective reviews.

Peer Review Activities
Make it easier for faculty to have their work reviewed by peers.

Faculty Directories, Committee, and Initiative Showcasing
Make it easier for faculty to learn about what their colleagues are doing. What committees they are working with, what initiatives they are championing, and more!

For Employers & Industry

Create opportunities for students do meaningful relationship building with employers and industry.

Collaboration/Idea Incubation
Showcase student innovation concepts and ideas for technology or business creation. Enable students, faculty and industry to exchange ideas and iteratively innovate them to make them more viable and practical.

Hackathons
Enable individual students or groups of students to review employer projects or problems and, over time, evolve their problem-solving visually and chronologically to accelerate problem-solving and demonstrate their evolving learning from the collaboration in open and controlled forums.

Talent Zones
Simplify employer access to your students by creating employer-friendly, privacy-driven talent zones.

Recruitment Directories
Give employers a convenient and easy way to showcase themselves and their opportunities to your students on an ongoing basis.

Showcasing Work done for employer/industry Partnerships
Showcase the research that has been enabled through industry partnerships.

Fundraising Showcases
Show potential donors an immersive look into the work they can support at your institution.

For Prospective Students

Show prospective students the best of your program with creative control and on the fly updates.

Open Houses & Virtual Events
Give prospective students an intuitive and engaging recruitment experience—incorporate student favourites like Kahoot, Discord, Live Streaming, virtual tours, and more.

Recruitment Events for Parents
Parents play a direct role in helping their children decide which higher education institute they'll attend. Give parents a clearer understanding of your educational programs, your campuses, and the value your institution will provide their children.

For Parents

Parents are an integral part of a student's support network. Help parents be more connected and supportive of their student.

Parent Orientation & Support
Help parents understand how they can better support their child through out their higher education journey.
